# Muhammad Afzal *Senior Software Engineer · Full-Stack Engineer*

afzalj166@gmail.com • +923052281739 • Lahore, Pakistan • Linkedin • Github • Portfolio

## SUMMARY

Senior Full-Stack Engineer with 5+ years of experience building multi-tenant SaaS platforms, web applications, and cross-platform mobile products. **Specialize in React, Next.js, React Native, Node.js, and NestJS, with hands-on ownership across frontend and backend architecture, integrations, and cloud delivery.** At Obenan, progressed into a full-stack lead role, delivering customer-facing features, improving performance, and mentoring engineers. Built AI-powered product features and use coding agents to plan, implement, and review production software.

## TECHNICAL SKILLS

**Frontend, Web & Desktop**
React.js, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, MUI, TanStack Query, SWR, Framer Motion, GSAP, PWA, Electron

**Mobile Development**
React Native, Redux Toolkit, Reanimated, Deep Linking, Code Push, Push Notifications, Offline App Support, App Store & Google Play Deployment, Real-Time & Offline Location Tracking, Expo, and native iOS/Android integrations

**AI & Voice Agents**
OpenAI, Hume AI, ElevenLabs, Pipecat, n8n, Voice Agents

**Payments & Billing**
Stripe, RevenueCat, Subscription Billing, Binance

**AI-Assisted Development**
Cursor, Windsurf, Claude Code, OpenAI Codex, ChatGPT, MCP, Prompt Engineering

**Backend & Databases**
Node.js, NestJS, Express.js, Python, PostgreSQL, MongoDB, Prisma, Strapi, Supabase, Redis, REST APIs, GraphQL, WebSockets, Caching, BullMQ, Queue Processing

**Architecture, Testing & Leadership**
Frontend & Backend Architecture, System Design, Microservices, Micro-frontend Architecture, Scalable SaaS Architecture, Playwright, Appium, Detox, Maestro, Sentry, Grafana, Microsoft Clarity, Code Reviews, Performance Optimization, Technical Mentoring, Agile/Scrum

**APIs, Integrations & Authentication**
Axios, Google Maps, Apple Maps, Geolocation APIs, OAuth 2.0, Firebase Authentication, Didit/KYC SDK, Agora, Third-Party API Integrations

**Cloud, DevOps & Infrastructure**
AWS, DigitalOcean, Docker, Kubernetes, Nginx, Vercel, Render, GitHub Actions, CI/CD, Firebase, Load Balancing, Monitoring, Logging

## EXPERIENCE

**Obenan** 03/2024 – Present | Lahore, Punjab, Pakistan
*Senior Full-Stack / AI Engineer (Full-Stack Lead)*

- Progressed from Frontend Developer to Frontend Lead, now leading both frontend and full-stack projects, with ownership of architecture, technical decisions, code quality, and production releases.
- Led development across Next.js, React.js, React Native, Node.js, and NestJS, mentoring developers, conducting code reviews, and building reusable component architecture, while leading production-ready React Native applications from scratch across iOS and Android.
- Architected products from scratch and expanded into full-stack development with Node.js, NestJS, REST/GraphQL, MongoDB, and PostgreSQL, delivering scalable multi-tenant SaaS features.
- Delivered affiliate/referral, subscription, and translation systems, with integrations including Stripe, Google/Facebook APIs, and third-party services, supporting businesses across 100+ directories.
- Built production-ready AI and voice features using OpenAI, Hume AI, ElevenLabs, and Pipecat, including AI-powered and voice-agent workflows.
- Improved performance to 90–95+ Lighthouse scores through SSR, image optimization, and caching, while managing AWS, Docker, CI/CD, Sentry, and Grafana for reliable production delivery.

**Global Software Consulting** 09/2022 – 02/2024 | Lahore District, Punjab, Pakistan
*Software Engineer — React Native & Web*

- Developed cross-platform mobile applications using React Native for iOS and Android across domains including real estate, e-commerce, news, and healthcare.
- Built responsive and reusable UI components, contributing to scalable mobile app architecture.
- Built advanced native features, including **audio/video calling** with WebRTC, background and foreground location tracking, and custom native modules bridging iOS and Android APIs.
- Integrated REST APIs to enable dynamic features such as authentication, data fetching, and user interactions.
- Fixed production defects and improved app performance and stability across iOS and Android releases.

## PROJECTS

**Obenan — AI Reputation Management Platform**

*Next.js, React.js, Node.js, Stripe, Strapi, GraphQL APIs, AWS, Docker, MongoDB*

- Built the Landing Platform and Omnipulse from scratch, translating Figma designs into scalable production UI while maintaining reusable component architecture
- Led full-stack development of the Landing Platform and contributed to Dashboard features, delivering scalable SaaS functionality, AI integrations, and performance optimizations.
- Developed platform capabilities supporting businesses across 100+ online directories and platforms.

**Reddr - Personal Safety Platform**

*React Native, TypeScript, NestJS, Next.js, PostgreSQL/PostGIS, Prisma, Redis, Twilio, SendGrid, Resend*

- Built the product from scratch across the mobile app, backend, admin portal, and marketing site; continue to lead development, app store management, and releases.
- Built wired detection and panic/emergency flows, including one-tap alerts, trusted-circle notifications, and live responder maps.

Android & iOS

**My Mind Bestie — Cross-Platform Wellness SaaS**

*Next.js, React Native, NestJS, TypeScript, PostgreSQL, Electron, Turborepo*

- Built web, iOS, Android, and desktop product surfaces in a Turborepo monorepo, sharing UI components, types, validation, and API clients.
- Implemented the multi-tenant architecture and NestJS services for authentication and content, alongside mobile audio/video streaming, notifications, and offline workflows.

**BestSMSHQ — SMS Activation & Number Rental SaaS**

*Next.js, NestJS, TypeScript, PostgreSQL, Prisma, Redis, Socket.IO, Bull, Stripe*

- Built NestJS services for SMS orders across 180+ countries, including provider integrations, Redis-backed rate limiting, background jobs, and real-time order updates.
- Built the Next.js dashboard with a wallet, Stripe and crypto payments, subscription tiers, API keys, and admin workflows.

**FoodSwitch — Digital Health & Nutrition Platform**

*Next.js, TypeScript, Node.js, PostgreSQL*

- Helped architect and build FoodSwitch's web dashboard from scratch for a nutrition platform with localized product data across 17 jurisdictions.
- Built dynamic UI mappings to render complex product and nutrition data, alongside other dashboard features and frontend/API integrations.

**Cohart — Social Marketplace for Art**

*React Native, React.js, Node.js, TypeScript, PostgreSQL*

- Architected and built the React Native application from scratch, translating Figma designs into responsive production UI across iOS and Android
- Developed social discovery, real-time interactions, chat, and marketplace functionality for artists, galleries, collectors, and art enthusiasts.

## EDUCATION

**University of Sialkot** 09/2018 – 08/2022

*Bachelor of Science - BS, Information Technology*
