SUMMARY

Full-Stack MERN Developer with 3.5+ years of experience building scalable web applications with React.js, Next.js and cross-platform mobile applications with React Native. Specialized in frontend architecture and performance optimization with backend experience in Node.js, NestJS, MongoDB, and Supabase. Proven track record of integrating REST APIs, third-party services like stripe, revenueCat, and real-time user tracking features, along with deploying and maintaining applications on Vercel, Render, AWS with CI/ CD pipelines. Experienced in leveraging AI-assisted development tools to accelerate delivery and enhance product quality.

TECHNICAL SKILLS

Frontend Development

React.js, Next.js, TypeScript, JavaScript (ES6+), HTML, CSS, React Hooks, Tailwind CSS, Material UI (MUI), Hero UI (Next UI), Framer Motion, GSAP, TanStack Query (React Query), Performance Optimization, Figma

Mobile Development

React Native, Redux Toolkit, State Management, React Native Reanimated, App Center, App Store & Google Play Store Deployment, **RevenueCat**

Observability & Monitoring

Sentry, Grafana, Microsoft Clarity

Backend Development

Node.js, NestJS, Express.js, MongoDB, Supabase, REST APIs, GraphQL (Apollo), Socket.IO , Strapi (Headless CMS)

Cloud & DevOps

Git, GitHub, AWS Amplify, AWS Lambda, Docker, Vercel, GitHub Actions, CI/CD, Firebase

AI & Voice Agents

OpenAI, Hume AI, ElevenLabs, Pipecat, n8n Automation, Voice Agents

Testing & Automation

Playwright, Appium, Detox, End-to-End Testing (E2E), Browser Automation

APIs & Integrations

Axios, SWR, Google Maps API, **Real-Time** Location Tracking, Geolocation APIs, OAuth 2.0, Firebase Authentication, **Stripe, Didit SDK**

AI-Assisted Development

Cursor, Windsurf, Claude Code, OpenAI Codex, ChatGPT, MCP Workflows

EXPERIENCE

Obenan

Software Engineer (Frontend Lead) (2 years 1 month)

- **Led frontend development** across multiple products: Landing Platform (Next.js), SaaS Dashboard (React.js), and Ompulse, guiding architecture decisions and production releases.
- **Architected and built** the Landing Platform (Next.js + Strapi) and **developed** the Ompulse frontend from scratch, while **contributing** to backend features.
- **Designed and implemented** scalable features, including a multi-language translation system and referral/affiliation tracking for partner revenue insights.
- **Optimized performance** using SSR, image optimization, and caching strategies, achieving 90–95+ Lighthouse scores.
- **Integrated AI-powered features** using OpenAI, Hume AI, ElevenLabs, and Pipecat, including voice agent workflows.
- **Also integrated** backend APIs, third-party services, and payment workflows (Stripe) to support listings, reviews, and subscription features.
- **Established observability and reliability** using Sentry, Grafana, and Microsoft Clarity; managed CI/ CD pipelines, Docker deployments, and AWS infrastructure.
- **Contributed** to sprint planning, feature scoping, and integration of REST/GraphQL APIs and third-party services.

03/2024 – Present

Lahore, Punjab, Pakistan

Global Software Consulting

React Native, React.js & Next.js Developer (1.5+ years)

- Developed cross-platform mobile applications using React Native for iOS and Android across domains including real estate, e-commerce, news, and healthcare.

09/2022 – 02/2024

Lahore District, Punjab, Pakistan

- Built responsive and reusable UI components, contributing to scalable mobile app architecture.
- Integrated REST APIs to enable dynamic features such as authentication, data fetching, and user interactions.
- Contributed to feature development, bug fixing, and performance improvements in production applications.

PROJECTS

Obenan — AI Reputation Management Platform [🔗](#)

Next.js, React.js, Node.js, Stripe, Strapi, GraphQL APIs, AWS, Docker, MongoDB

- SaaS platform for **AI-powered reputation management**, helping businesses manage listings, reviews, and local SEO across **100+ directories and platforms**.
- **Led full-stack development** of the Landing Platform and **frontend development** of the Dashboard and Omnipulse.
- **Built scalable UI components** and optimized frontend architecture for all products.
- **Integrated backend APIs, third-party services, and AI-driven features** to support listings, review management, and analytics.
- **Enhanced platform performance and reliability** through optimization, feature updates, and deployment improvements.

Etihad Town — Real Estate Resident Application

React Native, Strapi, GraphQL APIs

- Developed mobile application enabling residents to access property details and financial records.
- Implemented modules for news updates, community events, and resident notifications.

[Android](#) [🔗](#) & [iOS](#) [🔗](#)

Company Needs — Office Procurement Platform

React Native, Strapi, GraphQL APIs

- Developed an e-commerce style mobile application for office supply ordering.
- Implemented admin approval workflows for procurement management.
- Integrated backend APIs for product listing, order management, and delivery tracking.

[Android](#) [🔗](#)

SenSights

React Native, REST APIs, Mobile Health Platform

- Contributed to a remote monitoring and telehealth platform designed for senior care and personal emergency response.
- Implemented mobile features enabling **health monitoring, risk screening, and real-time alerts for senior-care staff**.
- Built cross-platform mobile functionality using **React Native for Android and iOS**.

[Android](#) [🔗](#) & [iOS](#) [🔗](#)

Life Design — Personal Goal Tracking App

React Native, REST APIs

- Developed a cross-platform mobile application for setting, tracking, and achieving personal life goals.
- Implemented user-friendly goal management features and interactive UI for engagement.
- Built scalable mobile architecture using React Native for Android and iOS.
